Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The indicated allowability of claims 4-8 is withdrawn in view of the newly discovered reference(s) to Titus and Chen. Rejections based on the newly cited reference(s) follow.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Titus in view of Chen.

Titus discloses a device comprising two components, each having a joining end and each having a connection means, and the connection means comprising a receiving means and a joining means.

Titus however does not disclose his device comprising his two components as being tubular and having a connection means comprising a receiving means and a locking means as claimed.

Chen discloses a device comprising a tubular member having a receiving space and an axial shaft (113), a spring disposed inside of the receiving space around the shaft and a plurality of L-shaped grooves. The elements provided for the purpose of locking to elongated handle members together.

Given the above teachings the examiner notes that it would have been obvious to one of ordinary skill in the art to configure the shafts and locking means of Titus as

claimed by applicant in view of the hollow shaft and springs locking pins and grooves of Chen, as known joining means in the art of locking two components of an exercise device together.

The restriction requirement of 11/13/06 is made final.
